MSc Advanced Computer Science

Northumbria University
2019 - 2020

BSc (Hons) Applied Computing

Northumbria University
2018 - 2019

HND Computing and Systems Development

Gateshead College
2017 - 2018

HNC Software Development

Gateshead College
2016 - 2017

WORK EXPERIENCE

Engineering / Software Engineering | Smart Mirror

June 2020 - October 2020

During my master's thesis project I have decided to use my creativity, technical and problem-solving skills to design and develop a prototype of a smart mirror system which uses Machine Learning technology and IoT principles to work as a connected home automation platform that could effectively compete with available commercial products.

Graphic Design | The Land of Oak & Iron

January 2018

I have been working on a graphics design project for The Land of Oak & Iron - North East Landscape Partnership, where I was requested to create marketing materials in the form of a digital leaflet.

Web Development | Drinks Trade

May 2017

As part of the HND course I have been working with a real-life client on designing and developing online web presence for a local start-up company. This included planning and creating a design and layout of a fully functional website which would later be used for a commercial purpose.

SKILLS

WORK EXPERIENCE CONTINUED

Web Design | Bees and Butterflies Flowers

May 2017

Second HND project involving a real-life client included designing and developing a website and subsequent marketing materials for a florist business in Hawthorn, Durham, UK.

Marketing / Graphic Design | Kimbereley Olsen-Brown

March 2016

I have had the privilege to be short-listed to take part in a graphic design project involving a local music management agency. The projected aim was to design creative media documents that would later be used for the artist's marketing strategy.

Engineering / Programming | BuildIt

January 2016

I have attended BuildIt program under the patronage of The Lord Puttnam, designed to learn the principles of hardware and software programming with the use of the Raspberry Pi platform. Later I had the chance to apply that knowledge by teaching school children how to program.

HOBBIES & INTERESTS

Avid piano player

Amature photo and video editor

Sci-Fi book reader

Weight-lifting enthusiast
